

TRAINING AND PROJECTS

"making your skills a priority"

Course Title: Operate a Water Cart

SAQA ID: 262764

NQF Level: 2

Credits: 8

Course Description:

This course trains individuals to operate a water cart safely and effectively. The program includes pre-operational checks, driving techniques, water distribution practices, and adherence to safety protocols. It equips learners with essential skills to use water carts for dust suppression, soil compaction, and other tasks in construction, mining, and agricultural settings.

Course Objectives:

By the end of this course, learners will be able to:

- Perform pre-operational inspections and basic maintenance on a water cart.
- Safely operate the water cart for controlled water distribution.
- Adjust water usage based on environmental and task requirements.
- Follow safety guidelines and emergency response procedures while operating the water cart.

Benefits of Completing this Course:

- Gain practical skills for water cart operation, essential in dust control and soil compaction.
- Increase workplace safety by understanding safe driving and water distribution techniques.
- Enhance employability in sectors like construction, mining, and agriculture.
- Obtain a recognized certification supporting career advancement in heavy equipment operation.

Who Should Attend:

- Construction and mining workers responsible for dust control.
- Heavy machinery operators aiming for water cart certification.
- Supervisors in charge of water cart operations on-site.
- Individuals interested in expanding their skills in equipment operation for dust management and site preparation.

Assessment:

Assessment will be based on the learner's ability to:

- Conduct thorough pre-operational checks and regular maintenance.
- Operate the water cart safely and distribute water effectively.
- Engage in practical activities and discussions related to equipment handling, load distribution, and safety.

TRAINING AND PROJECTS

"making your skills a priority"

Specific Outcomes and Assessment Criteria:

By successfully completing this SAQA Unit Standard, learners will demonstrate competency in the following:

1. Conduct Pre-Operational Checks and Maintenance on the Water Cart:

- Inspect the cart for safety and functionality, including water tank and distribution mechanisms.
- Identify and report any operational issues or maintenance needs.
- **Assessment Criteria:** Practical assessment of pre-operational checks and maintenance procedures.

2. Operate the Water Cart Safely and Efficiently:

- Control the water cart for safe and precise water distribution on different terrains.
- Apply techniques for efficient water spraying in dust suppression and compaction.
- **Assessment Criteria:** Practical exercise demonstrating safe water cart operation.

3. Manage Water Distribution Effectively:

- Adjust water flow based on ground conditions and task requirements.
- Monitor and control water usage to optimize effectiveness and conserve resources.
- **Assessment Criteria:** Practical assessment on water distribution and conservation.

4. Follow Safety Standards and Emergency Procedures:

- Adhere to workplace safety protocols to minimize operational risks.
- Recognize and respond to emergency situations involving the water cart.
- **Assessment Criteria:** Group discussion and practical exercises on safety compliance and emergency response.

By completing this course, learners will develop the skills needed to operate a water cart responsibly and efficiently, contributing to effective site management and improved safety in their work environment.
